

# BRAC Recycled Handmade Paper

**A BRAC Social Enterprise**

Being waste-wise to help prevent environment degradation

BRAC Recycled Handmade Paper (RHMP) was established in 2000 with the aim to help prevent environment degradation by targeting the corporate urban market.

## BRAC Recycled Handmade Paper today

Today BRAC RHMP operates as one of BRAC's green enterprises, producing synthesized paper products from recycled materials (ie, used paper, stalks of wheat, hay, water hyacinth, caustic soda, dye, barley, glue and cotton). These materials are gathered from various BRAC projects and branch offices, thus helping reduce the amount of waste produced. It also contributes toward employment generation for women and green initiatives across the country.

BRAC Green Enterprises is committed to environmental principles in its business operations. It is participating in environmentally-friendly activities to ensure that all processes, products, and services adequately address current environmental concerns.

BRAC Green Enterprises is a combination of two enterprises, which work under the umbrella of providing green solutions for the
